		Shipping temp: Transport to NRL frozen on dry ice and delivered within 1 week of freezing
HTLV DNA		
	<p>Test method:</p> <p>Specimen type, volume and transport requirements</p>	<p>In-House HTLV-1 PVL Assay</p> <ul style="list-style-type: none"> • A minimum of 4mL of Whole Blood collected in EDTA and transported at ambient temperature (15 - 25°C) within 7 days post collection. • A minimum of 4mL of Whole Blood collected in CPT) centrifuged according to tube manufacturer's IFU. Centrifuged tubes should be stored and transported chilled and, on their sides, to be received within 7 days of collection. • A minimum of 200uL of Buffy Coat, PMBC (resuspended in 100µL of PBS per 1mL of whole blood processed), cerebrospinal fluid (CSF) and Bronchoalveolar Lavage (BAL) samples transported frozen on dry ice post collection.

SPECIMENS SENT BY AIRFREIGHT MUST COMPLY WITH THE FOLLOWING CONDITIONS:

1. The sample should be packed and shipped in accordance with the IATA Dangerous Goods Regulations
2. For the specimens referred outside Australia, a copy of the NRL import permit and customs declaration should be attached to the parcel. A copy of the import permit and customs declaration template will be faxed.

3. The parcel should be addressed to: **Philippa Hetzel**
Director
NRL

4th Floor, Healy Building
41 Victoria Parade

FITZROY VICTORIA 3065

AUSTRALIA

Packages should not arrive on the weekend without prior arrangement.
